DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 3-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Flory (U.S. Patent No. 4,361,165). With respect to claims 1 and 7, Flory discloses a pressure relief arrangement comprising a sealing member (92) between two housing portions (12, 14), first means (54, 58) for applying compressive sealing force between the two housing portions, and second means (52, 40a, 40b) operative with the first means and independent of the sealing member, such that the first means applies the compressive sealing force between the two housing portions solely through the second means (52, 40a, 40b). The second means comprise at least one member (52) loaded in shear and becoming disintegral in response to overpressure exceeding a predetermined value.

3. With respect to claims 3 and 4, Flory discloses the second means to comprise a plurality of rupture disc members (52) having predetermined portions of reduced cross section. Examiner considers each pin (52) to be a rupture disc member. Each of these pins (52) has a reduced cross section when compared to an outer end portion of the pin. Additionally, the first means (54, 58) and rupture disc members (52) are dimensioned and assembled to focus applied forces in a predetermined manner to the rupture disc members.

4. With respect to claims 5 and 6, Flory discloses the first means to include third means (54) for focusing applied forces to the second means. The first means further comprises fourth means (42 and the axial through hole in flange 50) for aligning the first, second, and third means.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following references are cited to further show the state of the art with respect to pressure relief devices: Bell, Kushnick, Kubasta, Bernatt, Cowx, Maloberti (U.S. Patent No, 4,902,046), King et al, Maloberti (U.S. Patent No. 5,108,133), and Bodhaine.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael J Kyle whose telephone number is 703-305-3614. The examiner can normally be reached on Monday - Friday, 8:30 am - 5:00 pm.

7. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Knight can be reached on 703-308-3179. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9326.

8. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-2168.
